

Chaldale Harbor District

BY ORDER OF THE HARBORMASTER, pursuant to the authority delegated by Traffic Resolution 2019-14, the following standing procedures govern the making of offers of permanent moorage, the recording of skips, and the assembly of skip justification files at the moorage counter. This order supersedes Standing Order 15-2 and remains in force until rescinded or amended in writing.

1. Working a Slip

1.1 A slip is "worked" on the date counter staff begin the offer sequence for a vacancy. The clerk working the slip shall enter the date, the slip identifier, and the clerk's initials in the counter day log before any offer letter is prepared. The day log entry is the controlling record of the date the slip was worked.

1.2 The clerk shall print the waiting-list segment for the slip's basin and size class and shall mark, in rank order, each applicant considered and the disposition of each: offer made, skip entered, or not matched on preferences.

2. Offers

2.1 Offer letters shall state the slip, the basin, the monthly rate class, the foot-month basis of the charge, and the response deadline. The response window is ten (10) calendar days for covered slips (Ledgport and Vessbank) and fourteen (14) calendar days for open slips.

2.2 Telephone contact does not extend the response window. An applicant who cannot be reached shall be sent the offer letter at the address of record, and the window runs from the letter date.

3. Skips

3.1 A skip shall be entered only under one of the four Schedule C reason codes: vessel-fit, not-current, declined-prior-offer, or preference-mismatch. The clerk shall select the single code that states the true reason the offer could not be made.

3.2 The skip justification file shall be assembled on the day the slip is worked and shall contain the cover sheet, the supporting record, and any correspondence, in that order. A cover sheet without the supporting record does not meet the documentation standard.

3.3 Skips under vessel-fit shall attach the vessel particulars of record relied upon. Skips under not-current shall attach the ledger or register extract showing the deficiency. Skips under declined-prior-offer shall reference the prior offer by date and slip. Skips under preference-mismatch shall attach the recorded preference sheet.

4. Vessel Particulars and Measurement

4.1 Length overall shall be measured at the dock at check-in and rounded up to the nearest whole foot; the rounded figure is the billable length used for the foot-month charge.

4.2 Amendments to vessel particulars are entered only at the moorage counter terminal and are recorded in the register on the date made. From the effective date of Resolution 2022-06, a length amendment may not be used to qualify or disqualify an applicant unless supported per Resolution 2022-06 section 4.3.

5. Records

5.1 The counter day log, the skip event register, and the skip justification files are District records. Pages of the day log shall not be removed; errors shall be corrected by a single line through the entry, initialed and dated by the clerk making the correction.

5.2 This order is effective 1 April 2019.

President of the Board: Arlene Whitlock, President, Position 2

Attest: Dolores Ivers, District Clerk / Commission Secretary
