

Chaldale Harbor District

A Pacific storm system is forecast to bring southerly winds of 40 to 55 knots to the Chaldale roadstead beginning the evening of 15 October 2025 and continuing through 17 October 2025. (300) 555-0142

Effective 6:00 p.m. 15 October 2025: guest moorage is closed; the north approach and the Eastwey wave screen area are closed to small craft; and the pump-out station is shut down until the system passes. Tenants should double lines, check fenders, and remove canvas and loose deck gear. The fuel dock closes at 5:30 p.m. and reopens when conditions allow.

The counter remains open by telephone. Emergencies to the Harbormaster's duty phone. The District will post an all-clear notice when the closure lifts.
