

Chaldale Harbor District**SKIP REASON CODES -- COUNTER QUICK REFERENCE**

Public Port Authority And Marina Operator -- 1400 Tidewater Way, Chaldale, WA 98554, (360) 555-0142.
Post at the counter. A skip is keyed under exactly one of the four Schedule C codes
(Tariff Resolution 2019-14). The file is assembled the same day: cover sheet + supporting record + correspondence. The support is stapled to the cover sheet BEFORE the skip is keyed.

Code	When it applies	Attach to the file
vessel-fit	Vessel of record does not fit the vacancy (length, beam, draft) or exceeds the 40 ft covered limit and the vacancy is covered	Recorded particulars printout
not-current	Retention fee, account, insurance, or registration not current on the day the slip is worked	Ledger or register extract showing the deficiency and its date
declined-prior-offer	Prior offer declined or expired and eligibility for this slip class not restored	Prior offer referenced by identifier and date
preference-mismatch	Vacancy does not match recorded preferences (check amendment history first)	Recorded preference sheet

NOT skips: applicant not home when you called; applicant 'said last year' they were thinking of selling; the vessel you happen to know is in the yard. If the record does not show it, it is not the reason. When in doubt, make the offer -- a wrong offer expires in 10 or 14 days; a wrong skip is an appeal.

Response windows: covered slips (Ledgport, Vessbank) 10 calendar days; open slips 14 calendar days, from the letter date. Phone calls do not extend windows.

Length amendments: certificate or haul-out measurement sheet on file BEFORE the amended length is used (Resolution 2022-06 section 4.3). Applicant's own tape measure is not support -- measure at the dock or send them to a yard.
