Case No.: BYC-FND-2026-0147

06/15/2026

Facility: KVL Camps - Corrigwell (License No. YCL-2026-0417)

Sent by certified mail

Mr. Harold J. Brennan, Executive Director
KVL Camps, 18 Pinewold Road, Corrigwell Lake, AV 04237

Re: Finding of noncompliance - swim-ability assessment sign-off authority, Corrigwell waterfront

Dear Mr. Brennan:

Following a review of records produced by KVL Camps on May 27, 2026 and June 9, 2026, the Bureau of Youth Camp Licensing issues this finding under the youth camp licensing regulations governing aquatics program records. The Bureau's review concerned one question: whether the individual who has certified swim-ability assessments at the Corrigwell waterfront holds a credential that authorizes that certification under the camp's own credential-track authorization matrix, which the camp has adopted as its written standard and provided to the Bureau.

Finding

The Bureau finds that, beginning with the 2022 (spring) staffing change and continuing through the opening weeks of the 2026 season, swim-ability assessments at Corrigwell were certified by an Aquatics Supervisor holding an Aquatics Supervisor Certificate - a supervisor-track credential - which the camp's credential-track authorization matrix does not authorize for swim-ability assessment. The credential itself was current throughout the period. The deficiency is one of authorization, not of currency, training provider, or testing practice. The affected seasons are Summers 2022, 2023, 2024, 2025, together with assessments administered in the opening weeks of the 2026 season.

The Bureau notes for the record that the camp's operational documentation - water-quality logs recording free chlorine, pH, cyanuric acid ranges per CDC Model Aquatic Health Code norms, rotation schedules demonstrating the 1:25 supervision ratio, and incident and first-aid logs - was complete, consistent, and without adverse finding for the same period. This finding is therefore limited to credential authority. It is not a finding regarding water quality, supervision ratios, or camper welfare, and it should not be cited as one.

Required corrective action

The camp shall submit and implement a corrective-action plan within forty-five (45) days of the date of this letter. At a minimum the plan shall: (a) re-administer swim-ability assessments for currently enrolled Corrigwell campers whose classifications rest on the defective sign-off, using assessment-authorized staff; (b) institute a hiring-time verification step comparing each aquatics credential against the duty-specific authorizations in the camp's matrix; (c) describe the camp's examination of its other licensed sites and the status of each; and (d) identify the responsible party and completion date for each action.

The Bureau reminds the camp that the 2027 license renewal application is due to the Licensing Unit by July 15, 2026, and that the application must accurately describe the status of this corrective action as of the filing date. This finding does not suspend License No. YCL-2026-0417 for the 2026 season.

Enforcement posture

If the corrective-action plan is received and implemented within the forty-five (45) day period, the Bureau

Aldervale Department of Health

will consider this matter closed without penalty. Failure to respond within that period may result in further action under the licensing regulations, including conditions on the 2027 license. The camp may request an informal conference within fifteen (15) days of the date of this letter.

Questions may be directed to the undersigned at (555) 300-2200, referencing Case No. BYC-FND-2026-0147.

Respectfully,

Gerald R. Fenn
Chief, Bureau of Youth Camp Licensing
Aldervale Department of Health
